THE BASSBOOMZ SPEAKER

5. 3.5mm AUX-in jack
6. Power Switch
7. Micro USB port for 5V DC in

8. LED Power indicator
   a. Solid green indicates the unit is powered on
   b. Flashing green indicates low battery
   c. Red indicates the unit is charging

BEFORE USE

The BassBoomz speaker works when open or closed. However, when opened, the Bass Expansion System is activated, producing a fuller, richer sound.
To Open:
Grip the top and bottom of the unit and gently twist the top of the unit counter-clockwise. DO NOT pull hard once open as it will automatically extend to the proper position.
To Close:
Press the top and bottom of the unit together and twist the top of the unit clockwise to lock in place.

NOTE: Do not tamper with the centre tube at any time. Damage to the tube will result in distorted sound and diminished sound quality. Keep the rubber feet of the unit clean to reduce vibration. Use the speaker on a smooth, clean surface. A textured surface may result in unwanted vibration and diminished sound quality. Pulling the expandable speaker into open position forcibly will lead to permanent damage and void any warranty.
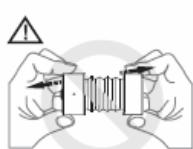

CHARGING THE BATTERY

The battery should be fully charged within 1.5 hours.
1. Connect the micro USB charging cable (3) (included) to the speaker (7).
2. Connect the other end of the charging cable into a USB powered port or any other USB AC adapter (not included).
3. The red LED light (8) indicates the unit is charging and will turn off when the battery is fully charged.
4. Disconnect power from the speaker by unplugging the power cord from the AC outlet (not by unplugging the power cord from the speaker).
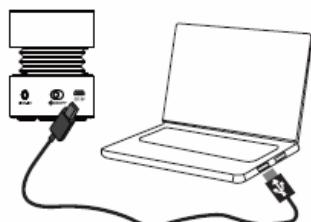

NOTE: If you start to notice sound distortion or the green LED is flashing, the battery is low and needs to be recharged.

AUX PLAY MODE

1. Plug one end of the 3.5mm audio cable (included) into the head phone or line-out jack of your audio device.
2. Plug the other end of the cable into the LINE IN jack (5) located on the back of the unit.
3. Slide the power switch of the speaker to ON position.
4. Turn on your audio device and play music. Make sure your audio device is charged and turned to medium volume.
5. Adjust the volume on your audio device to the desired level.
6. Slide the power switch to the OFF position when you are finished listening. You may also turn off your audio device.

NOTE: The speaker is powered by a lithium-ion rechargeable battery. If you start to notice sound distortion or the green LED is flashing, the battery is low and needs to be recharged.

BLUETOOTH PLAY MODE

1. Slide the power switch (6) on the speaker to the ON position.
2. Ensure that the Bluetooth function is turned ON, on your audio device (notebook, tablet, or smartphone).
3. Search devices on your Bluetooth enabled audio device and choose "BassBoomz" to pair.

NOTE: The password is only required when pairing devices for the first time. After this, the BassBoomz speaker will automatically pair with your audio device. Only one Bassboomz speaker can be paired via Bluetooth at a time.

FEATURES

BXS

BASS **EXPANSION** SYSTEM

Our innovative Bass Expansion System delivers a fuller, richer sound.

40MM DRIVER

BassBoomz come with an amazing 40mm driver incased in a sturdy aluminium frame. With a 3W output, this incredible little speaker can deliver deep, rich bass tones and crisp treble to rival larger speakers.

BUILT IN LI-ION BATTERY

Rechargeable Lithium Ion batteries allow for greater mobility enabling audio playback for 5-6 hours at 70% volume.

BassBoomz are compatible with all audio devices via Bluetooth or 3.5mm AUX input.

MAXIMUM COMPATIBILITY

Bluetooth v2.0 with EDR allows for enhanced data rate. It also enables simple, secure pairing, this improves the pairing experience for Bluetooth devices.

BLUETOOTH CONNECTIVITY

Play sound in Sterio and double the sound by connectingtwo BassBoomz together using the optional splitter cable!

FCC STATEMENT

Changes or modifications not expressly approved by the party responsible for compliance could void the users authority to operate the euipment.

This euipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This euipment generates uses and can radiate radio freuency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this euipment does cause harmful interference to radio or television reception, which can be determined by turning the euipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.
-- Increase the separation between the euipment and receiver.
-- Connect the euipment into an outlet on a circuit different from that to which the receiver is connected.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1)this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation
